

CYCLOTELIA®

Your natural partner to combat gloom and improve your well-being.

The flower of salt (Flos salis) comes from ecosystems in which microorganisms live and microalgae specific to saltwater environments.

Research by the TEXINFINE laboratory has shown that the oily extract of soiled Flos obtained by successive baths, patented under the name OESF™, induces in mammals the synthesis of Beta-endorphin commonly known as the hormone of happiness and well-being.

By combining this Fleur de Sel extract with Tahiti Vanilla extract, rich in molecules aromatic catechol type (I), and Padine, our research work has focused on that this alliance protects and enhances the bioavailability of Beta-endorphin.

100%

Vegetal

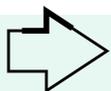

Natural alliance of Fleur de Sel, Padine and Tahiti Vanilla

CYCLOTELIA®, referenced in the VIDAL since 2010 and advised by health specialists, is a dietary supplement that restores and maintains the feeling of well-being :

- by improving the release of Beta-endorphin naturally dedicated to the management of well-being and thus stabilizing mood disorders: irritability, anxiety, moroseness.
- giving enough energy to cope with the sources of overwork.

CYCLOTELIA® helps you to better manage situations of discomfort and uncertainty.

(I): Aromatic structure of the nucleus of several cerebral neurohormones.

To the best of our knowledge, no adverse effects (addiction or rebound) have been reported, associated with the food consumption of CYCLOTELIA® .

This food supplement should be taken as part of a healthy and varied diet.
